

**FARM UNIT DECLARATION AND
LAND BASE REGISTRATION FORM B**

NMP # _____

In accordance with the Township of Blandford-Blenheim Nutrient Management By-law #1433-2004, the Township requires the following information to be included with a Nutrient Management Plan. This information is to be registered on the County of Oxford L.R.I.S. System.

LIVESTOCK FARM OWNER(S)/OPERATOR(S) NAME _____

ADDRESS _____

POSTAL CODE _____

TELEPHONE _____

FAX _____

FARM UNIT DECLARATION:

Municipally Regulated Livestock Farms requiring a nutrient management plan are required to develop the nutrient management plan (municipal) for the entire farm unit. Within the Nutrient Management By-Law, the term "farm unit" means all parcels of land, whether owned or rented, which are operated as one farm operation. This will include the principal farm residence, any other farm residences, barns and any other structures necessary to support the farm operation.

In order to determine which livestock must be accounted for, the farm unit includes all livestock on the same deeded property where the barn(s) is located as well as livestock from other deeded properties owned by the same person/corporation, if the manure from these properties is utilized on the land base of the farm unit. All of these livestock units must be accounted for in the nutrient management plan and identified as source properties on this form.

The farm unit includes the land base on the same deed as any livestock barns to which the nutrient management plan applies. It also includes any other deeded properties owned by the same person/corporation as well as any non-owned or jointly-owned lands used for manure application. Non-owned lands may be rental lands or lease lands or share-crop lands. Jointly-owned lands may be lands owned by the farmer and another person, such as his/her spouse, children or parents. In short, the lands which are to be used for the application of manure from any livestock barns included in the nutrient management plan make up the farm unit. These lands must be accounted for in the nutrient management plan (municipal).

The farm unit does not have to include livestock from other deeds if the manure from livestock on the other deeds is handled on a completely separate and definable land base. The owner must sign this document to indicate his/her intent to keep the different farm units (livestock and land bases) separate.

In accordance with this information, I, _____ (Livestock Owner/Operator) declare that the following properties comprise the farm unit. Should this farm unit constitute a Municipally Regulated Livestock Farm, I acknowledge that I am required to complete a Nutrient Management Plan (Municipal), and that such Nutrient Management Plan (Municipal) shall include all of the lands identified on this form.

LANDS INCLUDED IN FARM UNIT Beginning with the source property, please list all properties to receive nutrients from the source property. The source property contains the livestock barn(s) generating the manure nutrients. If there is more than one source property, please use the additional source property box, ie. Location 2 - Source Property. Otherwise use destination property boxes. (Please use other side if more space is required.)

Source Property: Location 1

911 #	Roll No.	Lot	Concession	Former Twp.	Township	PIN

Owner	Total Tillable Ac. Req'd by NMP to apply manure from source property	Total Tillable Acres on Source Property	Tillable Acres on Source Property to be used for NMP	Agreement Required: y/n?	Twp. Initials

I hereby agree that the manure generated from the farm unit identified on this form shall be applied only to the land base identified on this form. I understand that the application of manure generated by this farm unit to lands outside of this farm unit will be in contravention of the Nutrient Management By-Law of the Township of Blandford-Blenheim. In the case of a Corporation, I have the power to bind the Corporation.

I _____ hereby warrant that the information contained on Form B is true, as if taken under oath.

NOTES

1. Verification of lands outside the County of Oxford that are to be used in the calculation of the Nutrient Management Plan (Municipal) will be requested from the appropriate township.
2. Please allow two (2) weeks for processing by township.
3. Please submit 2 copies of Form B.
4. It will be necessary to re-submit this information at the time of the Nutrient Management Plan (Municipal) renewal.

TOWNSHIP APPROVAL

All properties noted on Form B have been checked on the County of Oxford LRIS System for the purpose of determining availability of land to be used in a Nutrient Management Plan (Municipal).
